The ultimate postural backrest support

Seating and positioning would be incomplete without the appropriate backrest support for you. The Octoback is a postural backrest that adapts to the user's needs.

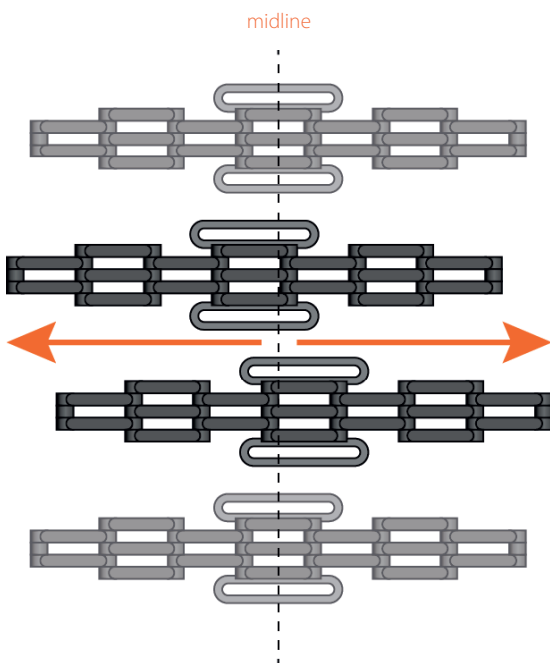

Good posture is vital for an individual's well-being and helps prevent issues associated with improper alignment. It allows for prolonged periods of activity without incurring muscle tension, which can lead to pain, stiffness, and fatigue

Just as our spine is flexible and elastic, allowing us to bend forward, backward, and sideways, the Octoback provides support for these movements. It helps you return to the correct position after each motion, eliminating the need to choose between posture and movement.

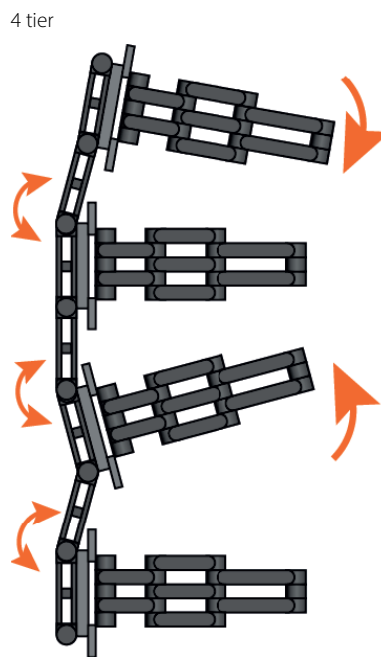

The Octoback is made up of vertebrae and ribs, like the human skeleton. The vertebrae allow you to increase or reduce their length and follow a scoliotic curve. The ribs can be changed in position, tilted, angled and removed. This modular structure enables limitless modifications and precise millimetre adjustments, ensuring a perfect fit tailored to the user's shape and needs

Offering tailored posterior lateral pelvic stabilisation alongside enhanced trunk support, the Octoback effectively reduces fatigue and maximises functionality. Ensuring comfort and stability for confident movement anywhere, **we've got your back.**

Technical Data Sheet

The best just got better

A series of new improvements to the Octoback makes this the most versatile Chunc backrest to suit all shapes, sizes and lifestyle

- **Full integration** of child and adult specification: for advanced trunk positioning to correct or support rotation/obliquity/curvature/asymmetry: scoliosis, kyphosis, lordosis, cervical extension.
- **Lateral supports** are multi-adjustable in angle, width, depth and height which allows them to be precisely positioned for each individual.
- **Spine-Aligned Posture:** Our goal is to fit the back to the user, rather than the user to the back. This is achieved by integrating a range of individual components to create unique shapes that optimise postural support, evenly distribute pressure, and maximize functionality.
- **Hardware** is designed to clamp to back cane tubing width 25mm. Non rotate clamps enable seat depth adjustment of 40mm forwards and backwards. Attach and remove with minimal effort.
- **Every day:** Removable, machine-washable cushions ensure prolonged comfort when sitting.
- **Support level:** Low, mid, upper thoracic and shoulder level.

Dimensions - Adult

Number of Tiers*	Total Back Height	Back Width Range
2	300mm	580mm-1060mm
3	460mm	580mm-1060mm
4	620mm	580mm-1060mm

*Further 15% individual tier height adjustment to the above

Dimensions - Junior

Number of Tiers*	Total Back Height	Back Width Range
3	220mm	385mm-565mm
4	300mm	385mm-565mm
5	380mm	385mm-565mm
6	460mm	385mm-565mm
7	540mm	385mm-565mm

Please refer to the **OctoRest Technical Data Sheet** for detailed headrest information

#thechuncway

Custom-made indoor and outdoor wheelchairs with built-in postural support for children and adults with moderate to complex needs.

Designed, manufactured and hand-assembled in Herefordshire, England (in 10 working days*).

Supporting your everyday needs –
and passionate about it too.

*98% all standard chairs made in 2024
